## PROFESSIONAL SUMMARY

Final-year B.Tech CSE student with hands-on experience in **data collection, data cleaning, EDA, and SQL-based data extraction** through two internships and end-to-end project development. Proficient in **Python (Pandas, NumPy, Scikit-Learn)** for data manipulation and pipeline development. Strong attention to detail and data quality awareness — critical for semiconductor R&D; environments.

## TECHNICAL SKILLS

|                       |                                                                                              |
|-----------------------|----------------------------------------------------------------------------------------------|
| <b>Languages:</b>     | Python, SQL, C, JavaScript (basic)                                                           |
| <b>Data Analysis:</b> | Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn, EDA, Data Cleaning, Feature Engineering    |
| <b>Databases:</b>     | SQL (SELECT, JOIN, GROUP BY, HAVING, aggregations), RDBMS concepts                           |
| <b>Visualization:</b> | Matplotlib, Seaborn, Streamlit dashboards, Excel reporting                                   |
| <b>Concepts:</b>      | Descriptive Statistics, Data Validation, Data Quality, KPI Analysis, Probability, Regression |
| <b>Tools:</b>         | Jupyter Notebook, Git, GitHub, VS Code, Streamlit, Flask, OpenCV                             |

## PROFESSIONAL EXPERIENCE

- Applied AI & Data Science Intern — Qubitedge Global Services** May 2026 – June 2026
- Completed structured program covering **Python, SQL, ML, Cloud & IoT** with focus on applied, real-world data problem-solving.
  - Built an end-to-end **data extraction & cleaning pipeline**: image collection → OpenCV preprocessing → EasyOCR text extraction → **CSV logging with rule-based data validation** layer.
- Python Development Intern — Elewayte (Remote)** Mar 2024 – Apr 2024
- Engineered **batch data-processing & data-wrangling pipelines** using Python OOP, automating file parsing and reducing processing errors.
  - Maintained technical documentation of data pipelines for reproducibility and team onboarding.

## KEY PROJECTS

### Student Helper AI – Academic Data Pipeline & RAG System

- Built a **RAG pipeline** (LangChain + vector embeddings) to extract, index, and query structured content from PDFs — end-to-end data flow from raw documents to insight delivery via Flask.
- Integrated NLP APIs to auto-summarize content and generate structured study notes from unstructured lecture data.

### NextFrame AI – Video Dataset Preprocessing & Evaluation

- Built a complete **data preprocessing pipeline**: frame extraction, normalization, outlier filtering, and time-series structuring for model training.
- Evaluated model using **SSIM and PSNR** metrics — quantitative performance reporting analogous to data analyst KPI tracking.

### Ghar Bano AI – Image Data Pipeline & Streamlit Dashboard

- Built **OpenCV preprocessing pipelines** to convert unstructured image sketches into structured inputs for generative AI.
- Deployed a **Streamlit dashboard** for data upload, processing, and visualization — analogous to a BI reporting interface.

## EDUCATION

|                                                                                     |                       |
|-------------------------------------------------------------------------------------|-----------------------|
| <b>B.Tech CSE — Lendi Institute of Engineering &amp; Technology, Andhra Pradesh</b> | 2023–2027   CGPA: 8.3 |
| <b>Intermediate (Class XII) — Narayana Junior College, Andhra Pradesh</b>           | 2021–2023   86.8%     |
| <b>SSC (Class X) — Sri Chaitanya E-Techno School, Andhra Pradesh</b>                | 2020–2021   99.5%     |

## CERTIFICATIONS

Applied AI & Data Science — Qubitedge (2026) ■ Python Certification — Elewayte (2024) ■ C Language — TechnoSoft (2024) ■ Joy of Computing (Python) — NPTEL ■ Human Computer Interaction — NPTEL
